Dear Sir,

On Monday night, July 27th, about 8:55-9:00 PM (just before Echo went overhead) I was looking in the NE quadrant of the sky and saw a double bright horizontal flash, (Est elevation 20° - 25° , est azimuth 25°) (seen from Roxbury, N.Y. about $74^{\circ}45'W$ & $42^{\circ}10'N$). The flash which proceeded from E to W appeared to be extremely large & brilliant as compared to any meteor I've ever seen. The duration of the

Dear Sir,

On Monday night, July 27th, about 8:55-9:00 PM (just before Echo went overhead) I was looking in the NE quadrant of the sky and saw a double bright horizontal flash, (Est elevation 20° - 25° ; est azimuth 25°) (seen from Roxbury, N.Y. about $74^{\circ}45'W$ & $42^{\circ}10'N$). The flash which proceeded from E to W appeared to be extremely large & brilliant as compared to any meteor I've ever seen. The direction of the

flash was about 2-3 sec. the color
was on intense, blue & then bright
orange. It looked, like a
sequential view, something like this

out - bright - dim - bright

would you please tell me what
I've seen? Thank you.

Sincerely
